

# Bringing the capabilities that Government missions demand

We specialize in delivering IT solutions for the Intelligence Community (IC), DoD, and Federal government. We bring experts in cloud architecture, modern application development, and data science that drive innovation and solve complex problems for our customers.

Blackspoke is an Arlington-based cSBA certified small business offering a breadth of information technology services. We started with a desire to help solve Enterprise-wide IT problems by combining engineering excellence with startup speed. Our employee base comes from startups, large system integrators as well as some of the world's largest software companies.

## WHO WE SUPPORT

### Intelligence Community (IC)

We support multiple IC customers across several programs as both a prime contractor and strategic small business subcontractor.

### Department of Defense (DoD)

We support infrastructure services, and applications support across the DoD, from NCIS to the Pentagon.

### Civilian (DOJ, FBI, US Courts)

We provide operations and sustainment of infrastructure and applications including cloud migration and operations, VDI operations, data warehousing and analytics.

### Contract Vehicles

- GSA MAS contract #GS-35F-381CA valid through 06/24/2025
- Special Item Number 54151S (IT Services), 132-45 Highly Adaptive Cybersecurity Services (HACS)

# CAPABILITIES TO SUPPORT MODERN MISSIONS

Our offerings help you maintain reliable, secure, and useful computing environments with the software and support you need to run a smooth military operation.

## CLOUD SERVICES

Let us help you embrace cloud native development and application hosting. Our well-architected designs can help support infrastructure as code (IaC) based approaches to decouple the application and platform layers to enhance security, scalability, and responsiveness. Our robust cloud analytics and insights have helped countless customers reduce their Cloud spend while maintaining performance objectives.

## SECDEVOPS

Our developers put security first, literally. We understand modern development pipelines and use automation to provide a continuous release and fast time to market for new capabilities without creating technical debt for operations teams or security holes for the organization. We thrive on secure networks and bring an underlying culture that embraces security and continuous learning as part of its core mission.

## MICROSOFT TECHNOLOGIES

Founded by former Microsoft engineers optimizing our customers investment in Microsoft based technologies is in our DNA. As a Gold partner we work seamlessly with Microsoft to integrate the latest advancements in Servers, business tools, and Cloud offerings to integrate and tailor them to the needs of your Enterprise. We have helped multiple Government Agencies adopt Office 365 at scale.

## DATA ANALYTICS

Data Lakes and analytics environments are the nervous system for today's critical decision environments. Modern command and control capabilities only perform at their best when they receive rapid access to accurate and timely data. We support some of the most advanced data and imagery systems in the world empowering our customers to ensure National Security.
